

THE DIDACTIC POSSIBILITIES OF EDUCATING YOUNG PEOPLE TO FRIENDSHIP IN THE FOLK PEDAGOGY OF KARAKALPAK

Bayniyazova Malika Polatovna

2nd year student of Master's degree of Management of
Educational Institutions, NSPI

ABSTRACT:

In this article, we will describe the didactic possibilities of educating young people to friendship in Karakalpak folk pedagogy, and we will also provide information on its place in pedagogy.

Keywords: friendship, patriotism, pedagogy, didactic possibilities, folk pedagogy

INTRODUCTION:

To spiritual and educational work after our country gained independence began to be considered as one of the important priority issues of our state policy. Since the beginning of the winds of independence in our country, people's minds, huge changes appear in the worldview, thinking, goals and aspirations, in a word, in the spiritual-ideological world, in the spiritual nature and even in the image started. Because independence is the gateway to freedom, nationalism, and patriotism opened and started people towards goodness. The head of our state Sh. Mirziyoyev – Independence patriotism, national traditions, friendship and values of youth in our country to educate in the spirit of respect, spiritually mature and physically healthy generation certain about bringing them to adulthood, protecting their rights and interests things are done. At the same time, the situation in the field and the implemented measures topical issues that concern a wide range of young people, especially creating suitable conditions for unorganized youth to find their place in life, to support them in every way, guide them to the profession and ensure their employment, due to the fact that work on the promotion of initiatives is not organized at the level of demand is a clear task about what we should do in this regard and gave instructions.

MATERIALS AND DISCUSSION:

At the heart of these words, we still have a lot to do in this area. Life itself proves that we have to do many things. - To our goal to achieve the building of a new democratic society, the fate of reforms to what forces what cultural and professional level our young people have what he has achieved, what ideas he believes in, and how spiritually it depends on its enrichment," said Islam, the first President of the Republic of Uzbekistan Karimov. Therefore, increasing access to information for young people, national educating a new generation capable of realizing the idea of universal human recovery is one of our most important tasks. That is why today the Uzbek people universal spirituality and national values formed over the centuries. Imbibing is important in raising young people to be patriotic and well-rounded people earns. Educating the young generation in our country in the spirit of love for the Motherland is considered as one of the main issues of culture and art. Because, culture and art are an important and integral part of the life of society, it is a person has the ability to have a strong influence on the psyche. When it comes to national patriotism, it is in the blood of the Uzbek people faith, honesty, love, consequence, passion, honor, to the motherland, to one's own country. Loyalty is understood as a set of moral and spiritual values, ideas, views. Forming and educating the sense of patriotism in educational institutions constitutes the main content of education. Kind feelings to the friends state symbols of Uzbekistan, flag, coat of arms, anthem, karakalpak language, the Constitution and other feelings appropriate to this nation, this land, qualities are reflected in cultural and educational activities. Young people that the issue of educating in the spirit of patriotism is one of the issues at the state level therefore, clearly planned road maps for such purposes are defined the goal is to implement the work consisting of tasks is appropriate. On the topic of friendship, many examples of creativity and opinions of our scientists and scholars have reached us. Amir Temur, Alisher Navoi. The work of Muhammad Zahiriddin Babur, Mirza Ulugbek and other ancestors its examples are still present, that is, in our time, it has a special place and is used as an example in the education of young people. Everyone interprets the concept of homeland in different ways, at their own level of understanding does. This is the place where a person is born, where the blood of the navel is shed, the period of childhood and youth it is a place where he passes, gets education, travels and stays. Motherland to love, to serve for his prosperity, to protect him from the evil eye and dark forces to protect, to protect his honor - all this

is yours and ours is one of the responsible tasks before us. The concept of the homeland, loving it, the feeling of honor and protection is not only in humans, but also in the animal world can be observed. A fish tends to water, an animal to its nest, an insect's nest. That's it even non-thinking creatures and insects recognize their home, build it, he lives in it with his partner, continues his offspring, and protects him when necessary. So he was gifted with intelligence and thought, and was the best of all beings in existence and in a person, this feeling should be highly developed. With intensity, the scope of the work carried out in our country during the period of development is expanding day by day. The efforts of the head of our state, with his initiatives, an unprecedented level of development in the life of our country, we are witnessing its steps. Peaceful living of people, protecting their interests, bringing our country to the world arena, and its reputation raising, in the words of the President, in the way of "pleasing the people". All the works and reforms are important strategic in the development of our society is considered as an issue.

The issue of youth education is the most important of our state's policies today is one of its strategic tasks. Education of young people and their personality, all general education schools are responsible for all-round development. These tasks to develop all abilities in students, to create creative aspirations is considered to be the main factor. Advanced ideas are happening in our time explanation of changes, as well as historical topics in a modern spirit son and it is a rich resource for raising girls' ideological beliefs and spiritual outlook is considered Only then will it have an emotional impact on the soul of the young generation strong national education that nurtures courage, bravery, and initiative in them. The concept of patriotism is often related to military activities is used. In one respect, this is true. But we only have this feeling if we use it in relation to the military, we are using it in the narrow sense of patriotism. It is appropriate to see patriotism in all activities.

CONCLUSION:

Everyone needs a kindred spirit, a person close to you, a person with whom it is interesting to spend time. A friend is a person who supports both in sadness and in happiness, who tries to help with every advice. But do we all know how to be friends? And in general - what is true friendship? It happens that two people communicate constantly, spend a lot together, but some have problems or joys, and

strong friendship is lost. Such people are said to have failed the test. Some of them were afraid of the other's problems, wanted to interfere, worried... And it will be even worse - one friend began to envy the other: his achievements, joys, victories. That is true friendship, they do not say that they are tested with joy, not misfortune. So what is true friendship in my opinion? I think it is necessary to learn from the test of these years. When people have been friends for many years, they have been through a lot of things and "tested strength". A true friend, in my opinion, wishes you only good, every help is help, tries to improve your life. This means that he always says nice things to you, not at all! On the contrary, a true friend, one of the few, will tell the whole truth to your face, open your eyes to something, shows you where you went wrong. After all, it is important - to stop or stop in time or to help in a direct direction. A true friend will never betray you, help you with any benefit. You can call him at any time of the day and tell him everything that is in your heart, share organization and support. Of course, friendship has two stages. Two people should equally value, protect and try to preserve their relationship. And then, in my opinion, friendship will be really strong and durable.
