As we live in an age where the Internet is rapidly developing, we must adhere to the culture of using the Internet. The Internet is like a web of a butterfly worm, if it makes a mistake in weaving, it will remain wrapped in its shell, if it continues to weave without making mistake, it will become a beautiful butterfly. If we also use the Internet to get the useful information we need, we can become good professionals in the future. Therefore, it is necessary to teach the youth to distinguish between white and black, and to understand that they should not fall into the wrong currents and get wrapped up in their shells.

Key words: Social networks, the Internet, popular culture, virtual world, Modern world, Instagram, Twitter, Facebook.

INTRODUCTION

A social network is an online platform used for communication, dating, social networking, leisure (music and movies) and enterprise functions between humans with comparable interests or offline connections.

With the development of time, the Internet "popular culture" is also growing rapidly. Nowadays it is difficult to imagine a person's life without social networks. We are living in an age of advanced technologies surrounding us play an important role in our lives. In the previous one hundred years, the concept of "mass culture" did no longer exist in human life. With the development of time, concept such as "the Internet", "Telegram", "Youtube", "Facebook", "Instagram", "Twitter", "OK", "Tik Tok" etc. developed swiftly in human life. These are the most popular social networks. That is, a new page known as "MODERN WORLD" regarded in our life. Social networks are becoming an integral part of modern society. The blessings of social networks are that you can research new matters there, girls and women can create their very own enterprise whilst sitting at home, have religious rest, and lengthy distance communication. Sources outline a social network as an online platform that human

being use to speak and create social relationship with different people primarily based on comparable interests. For the first time , the email structure of the social community appeared as a capability of communication between people. This was the first appearsnce of conversation via pc network .Originally created for the trade of information between two people , digital communication later grew to become a potential of verbal exchange between groups. Scientists R.Solomonoff and A.Rapoport , who first expressed their thoughts about social networks , expressed their opinion about the digital shape of communication in the middle of the remaining century. Hungarian specialists P.Erdos and A.Renilar informed their thoughts about the formation of social networks. In 1954 , J. Barnes, one of the representatives of the Manchestr school, delivered the time period social community into scientific sources as a separate concept. The speed endeavor of social networks is linked via scientists to the rise and improvment of communication between people on the Internet . Actually it is. You can also write , discuss and see your interlocutor . All you want is a laptop or telephone and the Internet.

Also you can communicate with acquaintances, study or important knowledge, share your news with other. If we count , the positive aspects are numerous.

But the internet has many benefits as well as negetive consequences as is the other side of the coin. If we think of social community as a wave of the sea , we humans are surfers, if the surfer loses his balance , he will fall under the waves, and if we use social networks incorrectly , we may additionally no longer be in a position to get out of its current. Many younger human beings are getting into awful ways and more than a few non secular moves due to the fact of social networks. This is one of the reasons for the usage of the web incorrectly. The slowness of the information consupcion culture among the youth, the lack of knowledge , skills and skills in distinguishing what is necessary from the flow of various messages is the reason why some people fall under the influence of malicious people and currents, and fall into the disease of Internet addiction. The fact that Internet addiction is recognized as a disease in the People's Republic of Chine and special hospitals for its treatment are established is proof of our world. Just like honey is sweet, social networks be used in sufficient quantity, without overdoing it. Also, about the truth that the Internet and social networks cannot be definitely condermned or justified, they can be evaluated positively or negetively depending on what reason human beings use them for, and today there is a lot of useful records on other social networks such "Telegram", "Youtube" facts used to be provided.

As social networks have become a powerful information weapon, they play an important role in the promotion and propaganda of ideological and ideological threats on a global scale. With the help of social networks, special attention is paid to influencing the hearts, minds and spirits of young people. As a result, the morale of the youth is lost. Therefore, we should not ignore the rise of various ideological and informational attacks. Only then will we be able to raise a spiritually mature person and a healthy generation.

Today, in order to prevent the negative effects of social networks of the Internet system, extraordinary Internet packages are created through present day data applied sciences in order to expand the spiritual workable of younger people, to freely express their creativity and to further extend the chances of facts exchange for talented and gifted children. It is applicable to create more, to put together focused projects and sectoral systematic programs on a variety of subjects for young people and continuously update them.

CONCLUSION

In conclusion, we would like to say that these days we are living in a time when the lifestyles of our society is increasingly harmonizing with the improvement of science and technology. Therefore, it will be recommended for every of us to follow the tradition of the usage of social networks, and in turn, to instruct it to others. Therefore, the basic of improvement is created through defending the religious and non secular world of generation from damaging elements, quite a number destructive, foreign and detrimental ideas. After all, he is spiritually mature and has intellectual potential education of the subsequent generation is turning into one of the most important duties no longer solely in Uzbekistan, however also in the entire world. It is the spiritually best technology that determines the future of the country. Spiritual maturity is an essential factor in the improvement of society.
