

## **NEIGHBORHOOD REFORMS ARE SHOWING PRACTICAL RESULTS**

Nigina Shoeva

Shorchi district administration

Head of Information Service

On the basis of new projects in the regions, great attention is being paid to improving the infrastructure of the city, providing clean drinking water, paving internal roads. All resources and efforts are being mobilized to ensure that every person lives happily.

No matter where you go in Shorchi district of Surkhandarya region of the Republic of Uzbekistan, you will witness large-scale creative works aimed at improving the infrastructure of neighborhoods and creating comfort for the population. In this process, many people are satisfied that serious attention is being paid to solving the problems and issues that have been waiting for a solution for many years.

In Shaldiroq neighborhood of Shorchi district, construction works are continuing in full swing, asphalt is being laid on the 2.5-kilometer road of the neighborhood, and drinking water networks are being laid. Mamayusuf Mamadiev from this region says that the problems in our neighborhood are being solved step by step with the initiative of activists and official leaders of our neighborhood.

Of course, the image of Shaldiraq neighborhood, like other neighborhoods of our district, is changing radically.

With the recommendation of the assistant mayor of the neighborhood, a preferential loan is allocated, and the number of entrepreneurs who aim to develop entrepreneurship, especially poultry farming, is expanding. Musurmon Yoldoshev, who is developing the poultry industry with the help of a preferential loan, is also mastering the secrets of quail breeding.

Indeed, poultry is one of the seven treasures. This treasure can stand in a corner of your house and bring good income to your family budget. To achieve it, all you need is desire and desire. Medical experts say that for a person to be healthy, it is necessary to eat an average of 10 kilograms of poultry meat and more than 100 eggs in a year. Because they are considered dietary products and are very useful for the human body.

Davron Pirmatov, another businessman in Shaldoq neighborhood, is raising broiler chickens in order to get quality and nutritious meat. Through the work of an entrepreneur who takes care of broiler chicks, he will have a good income in 45 days.

The changes and reforms in the "Kora Ariq" neighborhood in our district are certainly a cause of joy for the citizens.

81 support poles for electricity were installed and 1300 meters of cable wires were laid. As a result, residents of "Yanyi Er" and "Orta" villages in the neighborhood were provided with high-quality electricity.

In addition, it was very gratifying for 2100 residents of the village "Koymozor" of the neighborhood. The reason is that under the patronage of Sadiq Sherboev, the head of the "Sunny Field" farm, a 180-meter well was dug and clean drinking water was released.

Another convenience for the residents is that 3.1 km of road in the neighborhood has been paved. Of course, the reforms in the neighborhood are showing practical results. After all, construction, beautification and construction-repair works are being carried out in all neighborhoods in Shorch. The fact that our neighborhoods and villages are becoming more beautiful day by day, and the streets are becoming more prosperous, makes one happy.
