Student of the 301st group of TDPU "Deaf Pedagogy"

Abstract:

In this article, the role of parents in the process of integration of hearing impaired children into society, their correction, compensation and rehabilitation and the analysis of the world experience of bringing parents into this process were studied.

Key words: Parents, children, teachers, parent community, parents society, deaf and hard of hearing children.

«We will not be able to understand parental love until we ourselves become parents».

Henry Ward Beecher

Integration of a hearing-impaired child into society requires an integrated approach. In particular, the role of parents in this process is very large. But, unfortunately, we see various problems with the participation of parents in this process. For example: mental problems of parents due to the defect of their child, financial problems, problem of how to approach the child in this case, etc. In international experience, special organizations for parents have been created to solve these problems. In today's report we will introduce and analyze some of them.

GPODHH was formed at NHS 2008 in Como, Italy. It began with a meeting under the trees in Como where a small group of parent leaders who decided it was time that parents stood up and demanded that where change was happening, parents must be part of the solution.

The Global Coalition of Parents of Children who are Deaf or Hard of Hearing (GPODHH) is an international collaboration of parent-led groups and parent leaders dedicated to promoting improved systemic protocols and practices which encourage informed choice and the empowerment of families with a deaf or hard of hearing child throughout the world.

An inclusive world in which children and people, who are deaf or hard of hearing, and their families live meaningful lives on an equitable basis with others.

GPODHH is committed to promoting the safety and wellbeing of all children and young people. Guiding our practice is respect for the inherent rights of children and young people to be safe, happy and empowered, as outlined in the United Nations Convention on the Rights of the Child.

The Alexander Graham Bell Association for the Deaf and Hard of Hearing (AG Bell) helps families, health care providers, and education professionals understand childhood hearing loss and the importance of early diagnosis and intervention. Through advocacy, education, research, and financial aid, AG Bell helps to ensure that every child and adult with hearing loss has the opportunity to listen, talk, and thrive. With chapters located throughout the United States and a network of international affiliates, AG Bell supports its mission: advocating independence through listening and talking!

Fepeda is the European organisation of reference in the promotion of the equal rights of deaf and hard of hearing children and young people and their families across Europe. It aims to bring together the national organisations of parents and friends of these children and young people. All this in order to contribute a fully inclusive European Society where deaf and hard of hearing children, young people and their families have equality of opportunity and participation.

FEPEDA was founded in 1990. The founding members of FEPEDA were the associations from Belgium, Denmark, France, Germany, Ireland, Italy, Luxembourg, Portugal, Spain, the Netherlands, and the UK.

The mission of FEPEDA, acting through the National Associations of parents and friends of deaf and hard of hearing children and young people across Europe is to promote the equal rights of deaf and hard of hearing children and young people and those of their families, across Europe, by enhancing their life opportunities and by improving the quality of life of all deaf and hard of hearing children and young people and those of their families, irrespective of their social, cultural and financial status.

PARENT ORGANIZATIONS AROUND THE STATE

For state organizations seeking to implement the US-approved Parent-to-Parent practice to provide access to peer support for families of people with disabilities and special health care needs. Their main goal is for deaf and hard of hearing children and their parents to receive support and protection in all areas of life! They strive to

ensure that no parent feels alone. Association "Union of Parents in Russia". This organization unites parents whose children have various diseases. It all started with a union of parents whose children were recognized as “unteachable.”

- Help parents in acquiring a resourceful state.
- It is imperative to “include” the family in the child’s development process.
- Use a team approach in the work of specialists with families.

Society of Parents in Uzbekistan

Social and educational project Magic Ear. A social and educational project for hearing-impaired children and their parents, organized by the leading audiologist of Uzbekistan Nargiza Abdullaevna. The Magic Ear is a project organized throughout Uzbekistan, thanks to which today hundreds of children have the opportunity to hear. One of the best organizations involved in cochlear implantation and its rehabilitation.

Its founder, audiologist Nargiza Abdullaevna, says: “I believe that deafness is not incurable and there is a cure for it.”

The Magic Ear organizes rehabilitation work not only with children, but also with their parents.

Our associations, whose activities were presented above, have achieved positive results thanks to many years of practical experience.

Today, such organizations exist in Uzbekistan and it is advisable to further strengthen the outreach of parents and develop an “Uzbek National Module” on their basis. Student input into the organization of this work can lead to further development of this process.
