

"SURKHAN TEX" IS SURKHAN'S GREAT HOPE

Uygun Djumaev

Today, a number of practical works are being carried out in the area to further improve the business environment and provide comprehensive support to the representatives of the business community. After all, entrepreneurship quickly promotes a person, improves his work, brings blessings to his livelihood, and serves to ensure a prosperous life not only for himself, but also for others.

That's why the mayor of Jarkurgan district, Elmurod Avazov, regularly meets with businessmen, listens to the problems and issues of representatives of the industry, and opens a wide path to their proposals and initiatives. In the meetings held with the representatives of the business community, the main issue is to revive the production, give a wide path to export, and ensure the employment of the population by further improving the activities of the representatives of the sector. It is significant that the execution of appeals of business entities is under constant control, and the legal interests of business representatives are considered as an important issue.

At the same time, many business entities are operating in our district. Importantly, the district governor is always ready to support all of them. One such enterprise is "Surkhan tex" LLC, which produces yarn and fabric from cotton fibers.

A spinning and weaving factory is operating in this enterprise. Modern equipment was brought to the enterprise from Switzerland, Germany, China and Turkey. Currently, 330 workers are working here. The work and diligence of a single entrepreneur brought income to these families and led their lives in a positive direction, in the direction of creativity and work. Citizens who work in the enterprise and have decent conditions and good income are also satisfied with the entrepreneur. The enterprise produces 6,000 tons of yarn and 12,000 pogrameters of yarn per year. In 2023, the company exported products worth 14.7 million dollars. The district governor Elmurod Avazov familiarized himself with the activities of this enterprise, the conditions created for the workers, and the products being produced. Recommendations were given to the entrepreneur on expansion of activities, increase of jobs, implementation of new projects.

During the conversation with the workers of the enterprise, the head of the district motivated them and gave them valuable advice that there will be no shortage of hardworking people, that they should also study here and start their own business in the future, and take the initiative in increasing the economic potential of the district. It was also emphasized that every citizen who is engaged in entrepreneurship and works for the benefit of the society should be supported, given work and guidance if necessary.
