### ANNOTATION.

English is considered a dominant language in many countries, which, in turn, plays an important role in understanding and using great source of information. Additionally, it can be an instrument for learners to create future career path successfully. The ability to speak in English effectively opens door for everyone to reach goal in education, business, tourism, medicine and etc. Let us highlight how we able to take advantage of English proficiency.

**Key words:** Influence on self-confidence, academic achievement, career opportunities, learning capabilities.

### INTRODUCTION.

There are several priorities of learning English such as memory improvement, longer attention span and expansion of networking skill around the world. Moreover, English is a prime language in many fields of life. Interestingly, it is an official language of approximately 88 countries. The most prestigious universities and schools demand students who can be excellent in English. On top of this, QS Enrolment Solution reported that 69% of international students choose English-speaking countries, namely, Canada, United States, Australia, mostly, Great Britain. It has huge opportunities for people to express ideas or exchange information with other individuals worldwide.

#### 1. An Influence on self-confidence.

The most an essential aspect of personal development is building confidence during childhood. Learners tend to perform and prove their English proficiency in front of their peers. In this way, they can motivate, be inspired to show their language ability by attracting people's attention that, in turn, improves self-confidence.

According to Dr. Jean-Marc Dewaele from Birkbeck, University of London said that multilingualism and confidence go hand in hand. The most of students show that having ability to speak one more international language often show higher levels of self-esteem and better social skills.

#### 2. Academic achievement.

Being master in English can also enhance abilities which are close to this language such as writing, reading, mathematics. Furthermore, bilingual adults outperform their

monolingual peers in different logical and cognitive tasks.

A study from the University of Washington Institute for learning & Brain Science explained these advantages in multi-tasking ,problem-solving and decision-making skills.

### **3. Career opportunities.**

English is a number one instrument for employability.Today,from a blue-color job to a white-color job demand the candidates who are an excellent in English.There are number of English based professions that people can earn high-level of salary such as.....

- Publicrelationsmanager.
- English teacher.
- Librarian.
- Copywriter.
- Technical writer.
- Author.
- Journalist.
- Investor.
- Editor

Importantly,bilingual person has a chance to choose many lucrative jobs in several sectors,For example,in Travel-Relocation,Logistics,Science,Technology,Tourism, Education,Training,Business Management,Marketing,Health Science and so on.

### **One more example is Teaching.**

If proficient people in English start own online Teaching Business at home or a some comfort place,they may earn at least 15\$ an hour from one student in Uzbekistan.From this fact ,we can know how significant skill is in our life to live ever better.

### **4.Learning capabilities.**

Knowledge of English can gives to individuals great chance to travel and communicate more effectively across the world,which contributes positive effect for people to explore and to learn more about cultures and countries.

### **Let us look at some skills which comes from English.**

**Literacy.**( Reading literature is another natural way to develop these skills.You can tailor your vocabulary by understanding diverse terminology or simply become accustomed to new phrasings that you can use in everyday speaking).

- **Access to wealth of information.**(A study conducted by the University of Oxford revealed that a staggering 98% of academic publications in the sciences are written in English which means, students can get more resources on the internet rather than their own language ).
- **Critical and creative thinking.**(Scientists indicated that if people speak more than one language develop a memory,problem-solving skill,ability to better concentration than people who are monolingual).
- **Intercultural Understanding.**(Learning about other cultures is an invaluable part of developing a global perspective.Whether,it can be exploring the art and literature of another country,or attending a language class,each experience offers us a chance to broaden our horizon).
- **Communication.**(Learning any foreign language,especially,English can expose learners to different cultures and ways of thinking that will improve your overall communication skill).
- **Become a Polyglot.**(Proficiency in English has a couple of benefit in learning languages.First of all, you come to know and speak your first language better. Second, learning a third language is much easier than the second).

## CONCLUSION.

As English is an international language,it is dominant in many aspects of life.Therefore,being fluent in it is incredible important if person has intention to prosper in his or her life. We can reach our lifelong ambitions in education,earning potential,learning a number of skills through improving our knowledge in English.
