

## **THE VOLUME OF PRODUCTION IN UZBEKISTAN IS INCREASING**

Nigina Shoyeva

Shurchi district administration Head of Information Service

Our daily life cannot be imagined without cars. The reason is that cars are a convenient means of transportation that makes our distance close and our burden light.

However, the changes taking place in the image of cities and villages in recent years show the need for urgent reforms in this area, as in all areas. Therefore, a number of activities have been carried out in the areas of ensuring safety in the movement of cars, reducing environmental damage, road infrastructure, public transport, and increasing the purchase of electric cars.

In particular, as a result of the economic reforms carried out in the Republic of Uzbekistan, these industries have been consistently modernized, and despite the difficulties in logistics, the production of automobiles has tripled in recent years and is expected to reach 415,000 units by the end of this year. In order to eliminate the state monopoly and develop competition in the industry, 3 new private enterprises and prestigious foreign brands were involved.

Small business and private entrepreneurship is a solid support of the development of our country and the well-being of our people. As a result of fundamental economic reforms carried out under the leadership of the President of the Republic of Uzbekistan, this industry has become not only the main link in the formation of the gross domestic product, but also an important factor of the population's employment and income. The products produced by the entrepreneurs serve to increase the export potential of our country while ensuring the abundance of our markets.

The declaration of 2024 as the "Year of Youth and Business Support" in our country was another important step in the development of our country. Because investments drive the economy. At the same time, new technologies, advanced practices, highly qualified specialists enter the regions, and entrepreneurship develops rapidly.

The reforms implemented in Uzbekistan are also clearly expressed in Shorchi district of Surkhandarya region. In particular, "Agro world team" and "Agromax technic" limited liability company, operating in "Elbayon" neighborhood of Sho'rchi district, are serving the development of the economic sector and providing employment to citizens step by step.

- Drip and sprinkler irrigation technologies are produced, the projects of installation of these technologies necessary for farms are fully implemented by the employees

of our enterprise, - says the head of the enterprise Erkin Pardaev. - Currently, 15 of our employees are working. In the future, when these projects are fully operational, we will provide employment for 150 citizens.

Residents of our district know Tajinor Ishankulova, a business-minded, energetic and hard-working businessman. The entrepreneur, who created all the amenities for residents in the "Sevimli" shopping complex in the district, launched the next "Sevimli-2" shopping complex. As a result, 54 jobs were created.

- There are more than a thousand types of products in our shopping complex, which has all the conditions not only for residents, but also for employees, - says Tajinor Ishankulova. - We intend to expand the activity of our trading complex and create new jobs.

Of course, the saying that an entrepreneur is a helper of the people is not in vain. The more our hard-working, enterprising entrepreneurs increase, the more new jobs will be created, the population, especially the youth, will have a permanent source of income, and the welfare of our people will increase.

Production of 3-wheeled cargo motorcycles and scooters was started in "Bo'ston" neighborhood of Shorchi district with the help of 55 types of products owned by "Motoland" company manufactured in China. The sale of necessary equipment was launched at the "Kokhinur progress" enterprise headed by businessman Sarvarbek Jumaev.

Necessary legal guarantees have been created for small business and private business entities in our country. Knowing these guarantees and using them effectively is important for business development. Ensuring the priority of the rights of business entities is an important factor in the free and stable activity of industry representatives. This serves to increase the income of the population, provide employment, and further develop our country.

- In the future, we intend to expand our work and increase the number of employees to 150, - says Sarvarbek Jumaev. - In cooperation with "Motoland" company, we

would like to bring and sell such equipment as electric cars, motocultivators, bicycles, which are useful to our people.

At present, 32 workers are working in the enterprise, which produces 3-wheel cargo motorcycles and scooters.

From the owner of a small business to a representative of a large business circle, everyone contributes to the economic development of the country by establishing production, service, and export in some direction. Therefore, a person who provides employment to even one person is honored as an entrepreneur today, and all conditions and opportunities are created for his free activity.
