NEW MEDICAL INSTITUTIONS HAVE STARTED WORKING IN JARKURGAN

Dilnoza Charieva

Governorship of Jarkurgan district

Head of Information Service.

In the Surkhandarya region of the Republic of Uzbekistan, 26 family polyclinics and 15 family medical centers have been launched in the past 2 years, and 15 this year, in order to make the primary medical service closer to the population.

High-tech surgical operations were launched in the region, and a kidney transplant was performed for the first time. Also, thanks to the introduction of the "Angiograph" device to the regional cardiology center, surgical treatment of chronic and acute forms of congenital heart defects, ischemic heart disease, treatment of diseases caused by damage to the brain, kidneys and large blood vessels, and surgical treatment of cardiac arrhythmias, which have not been implemented in the region until now with "radiofrequency ablation" and "electro cardio meter" installation, the angiography method for the diagnosis of cardiovascular diseases of the body has been fully implemented.

2 billion 580 million sums were allocated from the local budget of the region and "Artificial blood circulation apparatus" was purchased in order to establish the practice of cardiac surgery in the multidisciplinary medical center. As a result, it was possible to perform 11 types of open heart surgery.

26 billion sums for the establishment of additional 44 family medical centers in the regions, the equipment of the Children's Cardiac Surgery Department and the Mother and Child Health Center, which will be established in the regional children's multidisciplinary medical center, based on the tasks given by the head of state during his visit to Surkhandarya region on March 13 of this year. 30 billion sums for the investment program, 50 billion sums will be allocated for equipping 12 medical institutions built and reconstructed within the framework of the investment program.

In order to improve the quality and efficiency of medical services provided to the population, and to create healthy competition, the number of non-governmental medical institutions is also increasing year by year.

Today, 326 private medical institutions (87 inpatients, 239 outpatient) are operating in Surkhandarya. In order to improve the quality of primary medical and sanitary care provided to the population, "Neighborhood Medical Centers" equipped with necessary medical equipment and supplies are being established and put into use in neighborhoods and villages located far from medical institutions.

A medical container was installed and repaired in the "Mehnatabad" neighborhood of the Jarkurgan district, located in the Surkhandarya region of the Republic of Uzbekistan, and a modern medical center building, enriched with all equipment, was built and put into use in the "Mustaqillik" neighborhood.

This medical center is intended to provide primary medical and sanitary assistance to the population, and more than 3100 local residents have had to attend departments in remote areas 8-9 km away for treatment and medical services.

In recognition of Erkin Qulliev, the head of the Medical Department of Jarkurgan district, today, the representatives of the population express their satisfaction with this happy event through their eyes.
