A NEW HOUSE IS THE FULFILLMENT OF NEW DREAMS AND HOPES

Nigina Shoeva

Shorchi district administration

Head of Information Service

In our country, great attention is paid to the provision of housing to the population, for this purpose, to the construction of multi-storey buildings that fully meet the requirements of the times. Of course, the construction of low-income housing for families with many children and people with disabilities is not excluded.

It is not an exaggeration to say that the multi-storey buildings that will be rapidly built throughout the Republic of Uzbekistan in the next 5 years, first of all, will be given to our compatriots who need it, have low income, and have disabilities, and it is also the reason for the restoration of relations between close relatives.

One of the good initiatives implemented in our country is the construction of multi-storey buildings. Through this, the dream of many families in need of a house is coming true. Residents who have transferred their salary for rent have also been made comfortable, and now they are directing this amount to a house obtained on the basis of a mortgage loan. On the plus side, the house stays to itself. Being a small citizen of the country brings peace to the people and opens the way to happiness.

In this process, it is appropriate to talk about the fact that Shorchi district of Surkhandarya region of the Republic of Uzbekistan is also developing day by day. Accordingly, the population of the region is also increasing.

The handing over of 30 new houses built by "Shorchi Road Entrance" Limited Liability Company in "Okkamar" neighborhood was a worthy gift to the new house owners.

The excitement and joy of the new owners of the house, the gratitude in their hearts also passed to us. We wanted to. We say "Blessed be the new houses!"

It is important to have a residence with all amenities to ensure the well-being of families and for the children being educated in it to be well-rounded in all respects. It is good to observe the reforms from the sidelines. But it is different to feel the effects of the changes happening in your country directly in your own life. In general, if we look at the scale of our entire country, at the initiative of the head of our state, in the next 4-5 years, such houses were handed over to thousands of our compatriots, and the construction of such comfortable dwellings, which serve the well-being of the population, is accelerating.
