Abstract

This in the article school age in children main problem has been knowledge efficiency decline , memory weakness , attention and of attention decrease such as problems " to the Internet of the disease of addiction reason what is happening , him cause issuing factors and them eliminate reach ways about about thought and considerations father of mothers their children from the internet to their use has been relations and control given

Keywords: Internet, youth , media, site, virtual addiction, cybersexual dependence, computer, web - surfing, parents, control, attitude.

People appear It seems that it is in search. To the need by himself considered necessary thing either by chance or thoughtfully by creating goes His own work relief, to people Naf to bring in order to created sometimes things too evil on the way use can now of life all to the fronts come in came mobile devices and the Internet network advantages let's count our finger not enough But theirs infinite opportunities negative also cause consequences it 's coming out person to worry puts

The Internet is his single information for and communication to the source becomes Teen virtual reality real accept as life does

Dependency the third stage and he is whole the time computer in front passes it this from the world take to exit has been each how to attempt relatively anger with in relation will be

virtual world of cosmetics dependency the following to groups divided into :

Go to the game dependence - different interesting to the games local has been teenager existence forgets He is active from life goes away , even eating , to himself look , rest , natural needs for to spend must has been time to play dedicates ;

Virtual dating lipstick put — only from the Internet friend search will be busy with , in real life friendly relationships forgets ;

Web- surfing is a ring on the Internet sit down He is clear without purpose it is from the site this to the site it's gone . The main thing is the Internet it has been .

Cybersexual addiction - porn sites watch does virtual sex from give up

That's why for him possibility until more training busy with to the computer lipstick put teenager from him let him go away . Various sports activities , clubs , music lessons , home chores this about the most good tool is considered A student to young people more attention Let's look at it from our work increase , his interests , dreams , behavior with let's be interesting . Today's teens tomorrow people will be Spirituality the whole , own to the worldview have , others to his opinion dependent didn't happen of the people the future will be great

Your child own in his room than usual more stay silent being will it stay ? He already is lessons by doing was and the rest on time telephone busy with ! Smartphone and over the internet what about information getting while parents for abstract and anxious condition

On the Internet very many useful and interesting information there is and from him right if used for a child it will be useful .

Kaspersky laboratory " researches according to parents of children online safety to provide they don't know and 90 percent parents in the Internet world of their children face coming possible has been from threats worry they get

Statistics to information according to the world from 8 to 13 years old has been from 90 percent of children more to the internet connected smartphone and from tablets uses Parents child on the Internet online to threats meeting worry even if they get them from this deprived to do wrong they consider it work .

Well , parents to the child on the Internet necessary to sources access without banning , there friends with to relationships interrupt without giving him from threats protection it is right to use how to teach can

We like the virtual world to children as real serious acceptance to do to teach need Otherwise it 's a house inside sitting online to threats meeting can Only this children entering content filtering from applications their use control make , online in space from threats warning safety system through if he does will be For example , Kaspersky Safe Kids year through this done increase can App with :

* How is the child from programs use about information you will get
* It is on the Internet certain from applications use for the time you set you give
* Your child on the internet activities control to do through to the regime you drop
The child is dangerous to the contents or adults for intended to resources want to enter if , the program to you warning notification sends
* Program your child's Facebook, VKontakte and so on another social in networks friends about information will give . If the child is suspicious friend st acceptance if he does , to you a warning signal is given .
* System through your child on the Internet moving safety perimeters is installed . If this is a child from the perimeter out if it comes out to you notification delivered . From this except , the child is now in the system where also check that can However , only technical opportunities with restriction it's not good If your child to the internet entrance due to his in behavior change happen that is happening if you notice , strong safety system is also friendly conversation cannot replace it . That's why for also with a child on the Internet himself catch rules , there meeting possible has been negative consequences about always open and sincere talking stand up
The child is on the Internet come in when it comes out in it some kind of change if observed (too happy or disturbed) , with him something face that he gave guess do it Face to face talk big the result does not give maybe , but sometimes the problem in the heat eliminate to do also allows . From this besides , to your child it is you for How important proved that you will be
O'z to his child real safety both in life and in the virtual world explanation , different from threats caution of parents is a duty . Cyber security issues serious acceptance do it Then you your children for example be service if you do , they are also from the internet without fear and pleasure with they use As a result they are social network label about all to knowledge have be grow up .

Together from the Internet. Your child on the Internet what with occupation , which from sources is using about be interested Do this wholeheartedly with the child talk sometimes with him together on the Internet time transfer (e.g together game play) it unnecessary from the contents protection to do enable will give . To the children independent way from the internet to use road do n't put to the Internet access for the device common in the room save Then the child is you that's

it on the ground that you are account received without himself control does If you of your child online activities personally observe if you don't get it , parents control from the app use .

Internet use the time restriction . To the children from the internet use for mold need To them on the Internet sit down for how much time enough to be about They came after asking without known time specify and this always control do it

To the children each how social on the network to the moderators inappropriate content about complaint to do opportunity that there is explain To them from this to use teach For example , offensive comments or messages turn off and the moderator informed do it In the child this with online actions about habit appear will be

Real life to the child and the virtual world to distinguish teach To the children on the internet information in real life condition with to compare need explain They are in life such as online careful in the world to be need let them know

From bed 10 minutes before your child with to talk spend : on how past , on the Internet what good or what bad that it was about talk His thoughts sincerity with acceptance do it Then it is har how with him in the situation benevolent to be feels possible and each always worries easily say takes

Judgment don't do it ! In virtual life children sometimes unpleasant situations they come In such cases your your reaction very important Do n't be angry , maybe to the child in the future what if he does right to be explain how road that he is holding from me control do it

Children with openly talk : social to the network downloadable the information is there forever stay can If the teacher or grandmother he uploaded photo what does he see ? to be possible or the child has grown up and is prestigious position the owner when this photo how effect to show thinking let him see . Children on the internet each one of their actions consequences understand need

Your knowledge level increase Virtual world about in detail to understanding have to be this about children with more reliable talk to get possibility creates Laziness Don't : your child which uses all social in networks from the list go , social on the network his friends to the line join her posts read , he is a member has been teams with meet Online safety about articles read , your child with on the Internet games play (so games have). Child time will pass of the world one part be - then it is you

with his own online life details share to see and your tips to listen with pleasure ready will be
