

IMPORTANCE OF FOREIGN LANGUAGES AND TEACHING THEM FOR SPECIAL FIELDS

Jo'rayeva Begoyim Usmonovna

Student of Shakhrisabz State Pedagogical Institute

Annotation:

In this article, you will be able to know the essence of learning foreign languages in today's globalized world. I am going to give the most important details why we need to learn other nations' languages as nowadays most youngsters have no clue about learning a new language so that I will give more general and specific examples and ideas. All of them are based on my experience.

Keywords: foreign language, opportunity, profession, white-collar job and broadens one's horizon.

In today's modern society, learning a foreign language is being the most important way to find a job or occupation. Knowing only one language allows us a lot of opportunities such as having a knowledge about one language broadens one's horizon. What's more, by learning languages, we can get the chance to learn another nation's culture, traditions as well as customs. Not only foreign language is a way of communication, but also it is an interactive way of contacting different countries with each other in terms of various conditions that are happening in the world, particularly, economic, political, military and cultural integrations. With the help of foreign language we can open a door to the new world that consists of new culture, new knowledge and new outlook. You know that our mother language is immersed in our head naturally after we were born. Learning another language is also this kind a thing that you are supposed to practise much more while learning it. I know a lot of people who can speak in 4 or 5 foreign languages and all of them work in the well-paid jobs like the white-collar professions. They tell me learning a new language is not a big deal that you struggle with, it is a fun and memorable moment, you spend your time for. Another chance is that having learnt a new language, you can simply change your lifestyle and your life. After learning a new culture, you may move to another country that you have already learnt its culture. And there everything will be more different compare to your native country as each language

has its own history, culture and customs. Take the Asian countries as examples. The China is so distinctive from my motherland, Uzbekistan. If I learn Chinese and visit this country, I will feel completely in another world. It means that language journey is full of unique emotions, motivations and adventures as well.

Foreign language is so essential for everyone and it does not require age limits. Every person may be older or younger may learn a new language as much as they can. There is one statement that I read in one newspaper like "One man in 76 ages can speak in more than a hundred languages said to this friend who is 54 years old knows 43 languages, you have a lot of time to learn any language, you are still young and you are in the entrance of learning a foreign language." This status quo gave me a hit for learning other nations' culture, language and traditions. Definitely, you will be able to travel to other European or Asian countries easily as you know their culture and language. If you know a language, you will not face with language barrier issues too. Foreign language is relevant in all spheres of life. Those who want to get a prestigious education or a job cannot do without it. You won't know the benefits of learning a language until you master it. While learning a foreign language, you will get to know the lifestyle, mentality, and worldview of that people. It is not noticeable from the first days you start learning the language, but as you master it well and perfectly, you will be sure that life is brighter and more colorful. Modern psychology suggests that learning a foreign language partially changes a person's character.

Here are the main reasons why we should learn a new language:

Internet coverage will be expanded for you. Since many people know one foreign language, they search for the necessary information on the Internet mainly in that

language. But those who know English and several other languages will have a hundred times more knowledge than that, because the number of primary sources for them will increase several dozen times. Furthermore, knowing a foreign language allows you to watch foreign films in reality. You will have the opportunity to listen to the real voice of your favorite movie actors and watch movies, not the voice actors for the roles played by both men and women. It will also help you pick up the puns and jokes in the dialogues. In this rapidly changing era, distance does not play a big role as it used to. The number of travellers is increasing year by year. When you join them, why not talk to a local guide about the artefacts you've visited without an interpreter. Those living in England who speak one language in addition to their mother tongue earn more than £3,000 a year. According to a study by Philip Beresford, who published the list of the world's richest people in Sunday List, a foreign language earns Westerners an average of £145,000 a year.

As there are a lot of opportunities so as to carry out our dreams why do not we learn a foreign language. I hope that after reading this article you understand about all the essences of foreign languages. Right now, if you finished reading this article, immediately start learning any language that you are keen on or being at the top.
